Objective

Aspiring Machine Learning Engineer with a strong foundation in Python, SQL, Machine Learning, and NLP. Seeking an opportunity to apply my skills, gain industry experience, and contribute to real-world AI solutions.

Education

Malla Reddy Engineering College, Hyderabad

2021 – 2025

Computer Science and Cyber Security

GPA: 8.01/10

Narayana Junior College, Hyderabad

2019 – 2021

Telangana State Board Intermediate Education

Marks: 974/1000

Model High School, Suryapet

2019

Telangana State Board Secondary Education

GPA: 9.5/10

Internship

JSpiders - Machine Learning Training Program

March 2026 – Present

Python, Machine Learning, Deep Learning, NLP

- * Undergoing structured training in Python, Machine Learning, Deep Learning, and Natural Language Processing.
- * Building end-to-end ML projects from scratch using Scikit-learn and real-world datasets.
- * Practicing data preprocessing, feature engineering, and exploratory data analysis (EDA).
- * Strengthening core ML concepts through hands-on implementation and project-based learning.

Cloud Technologies

Machine Learning Intern

- * Developed and evaluated Machine Learning models using Python and Scikit-learn for classification and regression tasks.
- * Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) on structured datasets.
- * Applied model evaluation techniques such as Accuracy, Precision, Recall, and F1-Score.
- * Built basic ML pipelines for data cleaning, training, and prediction workflows.

Technical Skills

Programming Languages: Python, SQL

Data Science: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering

AI & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)

Frameworks & Libraries: LangChain, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Tools: Jupyter Notebook, Google Colab, VS Code, Git, GitHub

Soft Skills: Problem-Solving, Communication, Adaptability, Organization, Collaboration

Projects

YouTube RAG-Based Document Chatbot

- Built an end-to-end YouTube Video Question Answering and Summarization System using Retrieval-Augmented Generation (RAG).
- Extracted video transcripts, performed intelligent text chunking, generated embeddings, and stored vectors in ChromaDB for semantic retrieval.
- Integrated LLMs to provide contextual question answering, video summarization, and conversational interactions.
- Developed a responsive Streamlit interface with source-aware retrieval and scalable architecture for real-time user interaction.

Bus Booking Using Multiple Agents

- Built a machine learning-based recommendation system to suggest movies based on user preferences and similarity between movies.
- Implemented content-based filtering using cosine similarity on movie metadata such as genres and keywords.
- Processed movie datasets using Pandas and Scikit-learn to generate personalized recommendations.
- Improved user experience by helping users discover relevant movies automatically.

Certifications

- **Google skills: Machine Learning**
- **NPTEL Certifications:** Achieved Elite certification in Data Science for Engineers
- Qualified in Gate DA 2025
